

## Wednesday Challenge Form

Group Members: Sona, Andrew, and me

Problem Statement: Create a capital letter E.  
After completion, you must construct someone else's design of a capital letter E.

Approach: Make the E in SketchUp as easy to build as possible. We do this by making it cornered, even sides, and no approximations in measurements.

Solution: We did our best to construct the E.  
The winners are Groups 1 and 6.

Lessons Learned: Let Sona do all of the cutting. Take your time.
