

Wednesday Challenge Form

Group Members: Jess, John, Sophie, Maddie, and me

Problem Statement: Create a perfect 90 degree Angle using three straws.

Approach: Use a template to help outline our approach. Strength is not in numbers, but in communication. Even though there is one massive group, we can beat them as long as we work hard and communicate effectively.

Solution: We barely got 2nd place, It turns out another small group won. (Tyler's Team)

Lessons Learned: Use mathematics to solve. Don't just eyeball it. Smaller groups won.
